

LESSON SEVEN: LOOK AT NATURE

Directions: Ask your child, "What is Nature?" Try to direct your child's thinking to the fact that Nature is the universe and the way that the universe works. Also, encourage your child to realize that all humans are part of Nature.

Then ask your child, "Who made Nature?" It would be great if your child said something to the effect of God or the Supreme Being, but any honest answer is acceptable.

Finally, take a walk outside, look at Nature together, and discuss how and why God created it. Make sure that you emphasize that the universe proves that God exists.
